

The name says it all

...almost.

Insl-x **ODORLESS Primer/Sealer** will keep the job moving when you cannot close an office, a school or relocate a group of patients just to avoid unpleasant primer fumes. It not only produces virtually no odor itself, dries in 30 minutes and sprays beautifully, this new generation, solvent-thinned primer is so efficient at blocking stains and odors that we even recommend it for fire restoration. No matter what your next job requires, Insl-x **ODORLESS Primer/Sealer** will help you finish on time with smiles all around.
