

AVOID ODORS

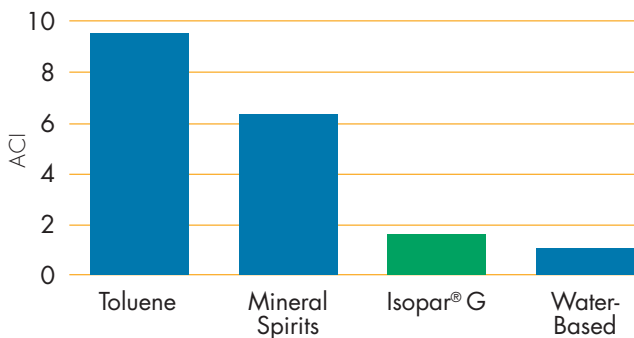

*With Seal-Grip
you can focus
on your work,
not the
odor.*

LOW ODOR PITTSBURGH PAINTS **SEALGRIP**[®] STAIN KILLING PRIMER

SEAL-GRIP Stain Killing Primer is formulated with Plioway[®] resins and Isopar[®] solvent to give you a **Low Odor** primer. Isopar leads to a lower Air Change Index (ACI) - up to four times lower than traditional solvent based primer.

Number of Air Changes Required in 1 Hour

Air Change Index (ACI): the number of air changes per hour needed to be within the Occupational Exposure Limit (OEL). A value lower than one is within the OEL and does not need to be renewed. Above one, the ACI value indicates the number of air renewals required to work safely with the paint without exceeding the acceptable limit. It is always good practice to ventilate.

BENEFITS

- Very low odor
- Specifically formulated to block out stains: smoke damage, food stains, graffiti, water soluble inks, tannin
- Works well on ceiling tile, drywall, plaster, masonry, interior and exterior wood
- Great for spray, brush, and rolling applications
- Quick drying time (1 hour)
- Formulated with Plioway® resins
